Hi, I'm Jakareya a Front End Developer skilled in creating websites that look cool and easy to use, especially with React JS and Next JS. Also, I have experience in Backend stuff like Node JS, Express JS, and MongoDB. But I specialized in React JS and it's ecosystem. My expertise in React Helped me to create user-friendly and responsive user interfaces using Next JS

My Projects

● **Headline Hub | A News Website**

- Headline Hub is a dynamic website to bring users the latest news and articles from a variety of publishers. With its sleek, user-friendly interface, Headline Hub ensures a seamless and engaging news browsing experience. Headline Hub aims to provide users with a seamless news browsing experience while offering premium content subscriptions for exclusive articles.

Others Options

- Others Options is a user-friendly web application designed to help users discover alternative products. The platform provides seamless account creation and login functionalities, enabling users to easily access personalized recommendations for products they are interested in. Others Options aims to assist users in finding alternative products, enhancing their shopping experience by offering diverse options.

Restaurant Management System

- Dine Ease is an innovative restaurant management system designed to streamline operations and enhance the dining experience. The platform offers a comprehensive suite of tools for managing reservations, orders, inventory, and staff schedules. By integrating these essential functions, Dine Ease helps restaurants operate more efficiently and provide exceptional service to their customers.

Education

● **H.S.C**
